PROFESSIONAL SUMMARY

Software Development Engineer with 1+ year of hands-on experience building production backend systems, enterprise ECM integrations, and cross-platform mobile applications in the UAE. Proficient in FastAPI, PostgreSQL, Docker, Flutter, and AI-augmented development workflows. Seeking full-time SDE roles in the UAE and EU markets.

PROFESSIONAL EXPERIENCE

Software Developer

Oct 2025 — Present

Missan IT Solutions — Sharjah, UAE [\[Full-time · On-site\]](#)

- Designed and built 20+ production REST API endpoints using FastAPI, powering internal business platforms used by cross-functional teams
- Architected PostgreSQL schemas supporting 5+ business modules with multi-tenant data isolation, RBAC, and constraint-driven workflows
- Integrated Windream ECM APIs to automate enterprise document workflows, reducing manual processing time
- Built mobile application modules (Flutter) serving enterprise users with real-time data sync
- Implemented authentication & RBAC using SuperTokens with multi-tenant hierarchy logic
- Dockerized backend services; leveraged AI tools (Claude Code, Codex) for rapid feature delivery

Software Engineer Intern

Jul 2025 — Sep 2025

Missan IT Solutions — Sharjah, UAE [\[Internship · On-site\]](#)

- Built initial API modules and proof-of-concept features using FastAPI, Docker, and REST architecture
- Developed proof-of-concept mobile and web modules; learned SuperTokens, RBAC, and multi-tenant patterns

App Developer & Digital Operations Coordinator

Jan 2025 — Jun 2025

OOMMAA Group of Companies — Dubai, UAE [\[Apprenticeship · On-site\]](#)

- Architected and delivered a cross-platform Handyman Service Booking App using Flutter and Firebase
- Implemented OTP authentication, Firestore real-time sync, GPS-based service matching, and push notifications
- Managed company social media campaigns, website updates, and digital document organization

Research Student

Jul 2023 — Sep 2023

MulticoreWare Inc. — Tamil Nadu, India [\[Internship · Remote\]](#)

- Enhanced autonomous vehicle performance through computer vision and Sensor Fusion (BEVdet, CUDA)

TECHNICAL SKILLS

Backend: Python, FastAPI, REST APIs, SuperTokens, JWT, Windream ECM, Node.js

Mobile & Frontend: Flutter, Dart, Firebase, HTML5, CSS, Figma

Data & DevOps: PostgreSQL, MySQL, SQL, Docker, Kubernetes, Git, GitHub

AI & Productivity: Claude Code, Anthropic Claude, GitHub Codex, Cursor, Prompt Engineering

EDUCATION

B.Tech, Computer Science & Engineering

Sep 2022 — Apr 2026

Kalasalingam University — Specialization in Data Science | CGPA: 8.38

Semester Exchange — ICT in Business

Nov 2024 — Nov 2025

Pacific Link College (PLC) — RAK Campus, UAE

ACHIEVEMENTS

- Won 1st Place with Rs.10,000 cash reward in a 24-hour IEEE Hackathon (TECHX JIT Madras) — built an AI-Driven Crop Disease Prediction System using Deep Learning, CNN, Streamlit, and edge computing
- Qualified for University-level Smart India Hackathon — designed a Drug Inventory & Supply Chain Tracking System using NFC-enabled cards
