

THARUN KUMAAR U

SOFTWARE ENGINEER · BACKEND & AI SYSTEMS

FastAPI · PostgreSQL · React · Flutter · Docker · Windows Server IIS · Windream ECM

UAE	+971 56 365 1564	Email	tharunkumaar.u@gmail.com	LinkedIn	linkedin.com/in/tharun-kumaar-u
India	+91 84896 44851	Location	Sharjah, UAE	GitHub	github.com/TharunKumaarU
Visa	UAE Resident Visa	Notice	3 months · flexible start	Portfolio	tharunkumaaru.github.io

PROFILE

Software Engineer with close to two years of UAE experience building and running production systems end to end: database schema, FastAPI backends, React dashboards, offline-first Flutter apps and the Docker/Ubuntu and Windows Server IIS deployments behind them. At Missan IT Solutions I own six client and internal systems, four of them live in production, including a field service platform used by around 200 people. I deliver faster than traditional development: my time goes into understanding the business problem and designing the system, and I use AI agent tools to accelerate implementation and testing, while architecture decisions and code review stay with me.

CORE SKILLS

Backend	Python, FastAPI, Django, SQLAlchemy (async), Alembic, Celery, Redis, REST API design, JWT, SuperTokens, RBAC, multi-tenancy
Frontend	React, TypeScript, JavaScript, Material UI, Redux, Vite, Next.js, Tailwind CSS
Mobile	Flutter, Dart, Riverpod, Drift (SQLite), offline-first sync, Firebase (FCM, Firestore), Play Store releases
Databases	PostgreSQL (schema design, row-level security, migrations, indexing), MySQL, MongoDB, SQLite
DevOps & Cloud	Docker, Docker Compose, nginx, GHCR, CI/CD, Ubuntu server, Windows Server IIS, self-hosted S3-compatible storage, Grafana monitoring
Enterprise	Windream ECM / DMS (install, configure, API, middleware to ERP and CRM), Active Directory, Microsoft MSAL SSO, Stripe, HaloPSA
AI engineering	Claude Code (subagents, Skills), MCP, OpenAI Codex — for implementation, debugging, testing and code review
Practices	System design, stakeholder requirements, production support, incident response, pytest, Git

PROFESSIONAL EXPERIENCE

Software Engineer	Oct 2025 – Present
Missan IT Solutions · Sharjah, UAE	Full-time
Joined as Software Engineer Intern (Jul – Sep 2025) and converted to full time.	

- Own client projects end to end: requirements with stakeholders, system design, backend, web and mobile apps, deployment and production support.
- Deliver faster than traditional development by putting the effort into the business requirement and system design, then using AI agent tools (Claude Code) to speed up implementation and testing.
- Run two deployment stacks: Docker Compose on Ubuntu (nginx, GHCR, CI/CD) and on-premise Windows Server IIS; monitor production with Grafana.
- Resolve production incidents on live client systems (record collisions, timesheet data loss, mobile sync failures); every data fix ships with a tested repair and rollback script.

KEY PROJECTS · CLIENTS CONFIDENTIAL

Field Service Management Platform	Live · ~200 users
Multinational industrial services client · FastAPI · PostgreSQL · Celery · Redis · React · Flutter · Docker	
• Took ownership of the platform, led the redesign of its system architecture and built it end to end: a 13-module FastAPI backend, a React manager portal and an offline-first Flutter field app on the Play Store, so technicians keep working with no signal. • Multi-entity data isolation with 3-level permission inheritance; 6 Docker containers in production behind nginx; in continuous release. Main point of contact for the client's stakeholders.	

Enterprise Document Management — Windream ECM

Live · 5 clients

Windream ECM · Windows Server IIS · Active Directory · FastAPI · React

- Deploy and configure Windream on customer servers to fit each business workflow, and build middleware connecting it to ERP and CRM systems.
- Production support for 5 client environments handling around 2,500 documents a month; design the configuration for new clients from requirements gathered directly with them.

Facility Maintenance Ticketing Platform

Delivered

Property portfolio client · FastAPI · PostgreSQL · React · Flutter

- SLA-driven ticketing on web and mobile with an 8-role hierarchy and automatic authority fallback (Supervisor → Manager → Admin), quotations and a materials workflow.

Multi-Tenant SaaS Platform

In development

In-house product · FastAPI · Stripe · Microsoft MSAL · SuperTokens · S3-compatible storage · React · Flutter

- Subscription billing on Stripe, enterprise single sign-on through Microsoft MSAL, SuperTokens authentication and an in-house S3-compatible storage bucket, with a React/TypeScript console and a Flutter client.

Live Django Application — Takeover & Support

Live

Client web application · Django · MongoDB · Windows Server

- Took over a production Django + MongoDB application; mapped the codebase, shipped scoped changes behind feature flags and set up rollback-ready deployments.

Also built: a geofenced attendance and HR mobile app (Flutter, Firebase FCM, background services) — live internal tool.

App Developer & Digital Operations Coordinator

Jan 2025 – Jun 2025

OOMMAA Group of Companies · Dubai, UAE

Apprenticeship

- Built a Flutter + Firebase prototype of a handyman service booking app to show the outsourced development team exactly what the business needed: OTP login, real-time booking updates, GPS-based provider matching and push notifications.

OPEN ENGINEERING PLAYBOOKS

Clean-room write-ups of the architecture behind my Missan projects (client code stays under NDA) · github.com/TharunKumaarU

Seamless Offline Architecture — outbox, idempotency, sync and conflict handling for offline-first apps.

Multi-Tenant B2B SaaS — tenant isolation with PostgreSQL row-level security, RBAC, idempotent webhooks.

Brownfield Django — safely taking over a live app: characterization tests, feature flags, rollback.

EDUCATION

B.Tech, Computer Science & Engineering (Data Science)

Kalasalingam University (Kalasalingam Academy of Research and Education), India

Sep 2022 – Aug 2026 · CGPA 8.34 / 10 · First Class with Distinction. Final-year semester completed alongside full-time UAE employment.

Semester Exchange — ICT in Business

Pacific Link College, RAK Campus, UAE

Nov 2024 – Nov 2025

CERTIFICATIONS

Claude Code 101 — Anthropic Academy

Sep 2026

Claude 101 — Anthropic Academy

Aug 2026
